Total Time: 15 min **Total Marks: 10**

Roll#: 25F-0755 **Name:** Muhammad Taha **Section:** BCS 1B

Q1. 10

Write down a small piece of code to print a triangle of alphabets. Number of rows will be taken as input from the user and must be between 1-26, otherwise ask the user to input again. Once the user gives correct input the shape will be drawn, and the program will exit after that.

Use appropriate loops.

Inner most loop must have char datatype of loop control variable.

6

Sample run 1	Sample run 2
Please enter size of Triangle (1-26): 4 Z ZY ZYX ZYXW Thank you for using the program	Please enter size of Triangle (1-26): 27 Entered size is incorrect Please enter size of Triangle (1-26): 3 Z ZY ZYX Thank you for using the program

```
int main( ){
  int rows;
  do {
      cout << "Please enter size of triangle [1-26]:" ;
      cin >> rows;
  } while ( rows < 1 || rows > 26);

  for(int i=1; i<=rows; i++) {
      for(char j= 'Z' ;j>=92-i; j--)   {
          cout<< j ;
      }
      cout << endl;
  }
  return 0;
}
```
